

8/15/2014

Dear Patients,

Salem Psychiatric Associates and Valley Mental Health are working hard to improve care to our patients. In order to do this, we are changing the way in which we prescribe and refill medications.

Medications will be managed and refilled during your appointments. This will help in the following ways:

- We can confirm your medications, dosages, check for side effects and send refills in.
- You will be prescribed enough medication to last until it is necessary to see you again.
- You will have an opportunity to discuss any medication concerns you have directly with your prescriber.
- You can request information about your prescribed medications or diagnoses.

Please make sure you have an appointment with your prescriber BEFORE you run out of any medications so they can be refilled during this time.

Thank you,

Salem Psychiatric Associates and Valley Mental Health
